Summary

Fullstack Developer with 2+ years of experience shipping production React (Next.js) and Node.js (NestJS) systems in fintech SaaS. Proven track record of optimizing data pipelines for 1M+ records (90% faster), building AP automation features, and collaborating cross-border with teams in Singapore and Korea. Passionate about AI agentic workflows and MCP systems.

Experience

Bizzi, Fullstack Engineer

Ho Chi Minh City, Vietnam

Jan 2023 – present

- Architected and integrated AI Agentic workflows and custom MCP servers into the AP automation engine, enhancing autonomous invoice capture and approval accuracy
- Build AP automation features (invoice capture, approvals, payments) with Node.js/TypeScript services and React dashboards
- Implemented role-based access control, audit logging, and secure document storage for enterprise compliance
- Optimized invoice export performance from 45 minutes to 5 minutes through data pipeline optimization
- Processed and optimized data pipelines handling 1M+ records, achieving 90% faster processing
- Collaborated cross-border with teams in Singapore and Korea on fintech product development

Cigro, Software Engineer (Contract)

Singapore (Remote)

June 2023 – June 2024

- Integrated Sendbird chat and Firebase push notifications for real-time communication features
- Implemented BullMQ background job processing for asynchronous task handling
- Built real-time notification system for user engagement

Axpara, Software Engineer (Contract)

Korea (Remote)

Jan 2023 – Jan 2024

- Developed canvas annotation tool for collaborative document review
- Improved engineer workflow productivity by 30% through tool optimization

EveryTalk, Fullstack Developer

Vietnam

June 2022 – June 2023

- Built real-time 1-1 chat system with WebSocket integration
- Implemented video call system for peer-to-peer communication

Education

B.S. **FPT University**, Software Engineering (GPA: 3.2/4.0) 2020 – 2024

Projects

Agentic RAG for Dummies

- Built an open-source multi-agent reasoning system using LangGraph and TypeScript for complex document processing

Awesome Claude Skills

- Developed customized tools and Model Context Protocol (MCP) servers to optimize LLM workspace integration

Skills

Languages: TypeScript, JavaScript, C#, Go

Backend: Node.js, NestJS, Express, .NET, GraphQL, REST APIs

Frontend: React, Next.js, Tailwind CSS, Redux

Database: PostgreSQL, MongoDB, MySQL, Redis

DevOps & Cloud: Docker, Nginx, AWS, Grafana, Prometheus, Git

Architecture & Practices: Microservices, CQRS, Saga, Event-Driven, Clean Architecture, Agile, CI/CD, TDD, OOP, SOLID, DDD

AI & Emerging: MCP, LangChain, LangGraph, RAG, AI Agent Workflows
