Summary

Fullstack Developer with 2+ years of experience shipping production React (Next.js) and Node.js (NestJS) systems in fintech SaaS. Proven track record of optimizing data pipelines for 1M+ records (90% faster), building AP automation features, and collaborating cross-border with teams in Singapore and Korea. Passionate about AI agentic workflows and MCP systems.

Experience

Bizzi , Fullstack Engineer	Ho Chi Minh City, Vietnam
- Build AP automation features (invoice capture, approvals, payments) with Node.js/TypeScript services and React dashboards - Implemented role-based access control, audit logging, and secure document storage for enterprise compliance - Optimized invoice export performance from 45 minutes to 5 minutes through data pipeline optimization - Processed and optimized data pipelines handling 1M+ records, achieving 90% faster processing - Collaborated cross-border with teams in Singapore and Korea on fintech product development	Jan 2023 – present 3 years 5 months
Cigro , Software Engineer	Singapore (Remote)
- Integrated Sendbird chat and Firebase push notifications for real-time communication features - Implemented BullMQ background job processing for asynchronous task handling - Built real-time notification system for user engagement	June 2023 – June 2024 1 year 1 month
Axpara , Software Engineer	Korea (Remote)
- Developed canvas annotation tool for collaborative document review - Improved engineer workflow productivity by 30% through tool optimization	Jan 2023 – Jan 2024 1 year 1 month
EveryTalk , Fullstack Developer	Vietnam
- Built real-time 1-1 chat system with WebSocket integration - Implemented video call system for peer-to-peer communication	June 2022 – June 2023 1 year 1 month

Education

Bachelor - FPT University, Software Engineering	2020 – 2024
